- [1] Battery operation and recharge times will vary based on many factors, including screen brightness, applications, features, power management, battery conditioning and other settings.
- [2] Tested under MIL-STD-810H method 501.6, Procedure II, and method 502.6, Procedure II. Battery capacity is reduced at lower temperatures or extremely high temperatures. Batteries should neither be charged at temperatures below 0C or temperatures above 45C to avoid impacting battery longevity and performance.
